

Bidbury & Co.

USA EDITION

More than just a quality product

Bidbury & Co are a British company who produce an amazing collection of truly inspiring products for customers searching for not only the very best products, but also those who appreciate the attention to detail in product design, reliability and after-sales service.

The team at Bidbury & Co have over 50 years' collective experience in the sink and tap industry. This invaluable experience has helped shape the current range of products and that of future product expansion.

Valuing our customers is at the heart of everything we do. The Bidbury & Co philosophy is to go above and beyond both in terms of creating superior products and also, just as importantly, an after-sales structure and service that provides a relentless drive to offer consistently high levels of customer service.

State of the art technology is used alongside traditional methods to ensure every single Bidbury & Co product is made to an exceptional standard.

Each tap constructed for the United States uses lead free brass of the very best quality. We are also very conscious that any additional parts such as O-rings and ceramic valves that go into the construction of a Bidbury & Co tap meet our exacting requirements. Ceramic tap valves are tested hundreds of thousands of times to ensure they are capable of delivering many years of trouble-free use. In most cases, they are tested to replicate 20-30 years of typical usage.

In essence, a Bidbury & Co tap is manufactured to be one of the best premium taps available on the market today. A constant desire to create something special ensures our team stay focused on being able to exceed our customers' expectations. Not an easy feat, but a challenge we gladly accept every single day.

You are in safe hands

The good news is Bidbury & Co offer one of the very best levels of customer service and warranty cover in the industry. The bad news is you'll probably never need to use it!

Every Bidbury & Co product is made to an exceptionally high standard and will provide many years of trouble-free service.

However, in the unlikely event you experience any problems, whether it's a defect in the material or the workmanship, you can be sure we are here to offer a swift and efficient service to rectify the problem.

For kitchen taps and accessories, including the straight leg kit and replacement solid levers, we guarantee all parts for a period of up to 5 years (subject to registration). Unlike many other manufacturers, we even include components such as O-rings and seals!

All products come as standard with a 2 year warranty and you don't need to do anything other than keep your proof of purchase. However, we offer a FREE extended warranty which gives a total warranty period of 5 years. All you have to do is register your product within 30 days of purchase.

Ideally you should register online at <https://bidburyandco.com/team-bidbury/>

If you are unable to register online, we are here to help! Simply call one of our Bidbury & Co team members on 0333 33 55 956 (Mon-Fri 9-4pm).

- Cold supply only
- Minimum operating pressure 0.5bar
- Recommended operating pressure 1.0 – 2.0bar
- Special order finishes available (see page 46)

Beautifully subtle with a touch of class. Bidbury & Co porcelain indices clearly indicate both hot and cold controls.

The image shows two brass faucets mounted on a rough, light-colored stone wall. The faucets have a classic, ornate design with curved spouts and white ceramic handles. The top faucet is angled upwards, while the bottom one is angled downwards. The stone wall has a natural, irregular texture with some darker patches. The lighting is warm, highlighting the metallic sheen of the brass.

Effortless
Functionality:
Its time to say
goodbye to the
hassle of
carrying heavy
pots from sink
to stove.

Aldsworth
